Join us for an evening with Ronda Muir, author of *Beyond Smart: Lawyering with Emotional Intelligence*.

Statistics show that individuals with higher emotional intelligence are happier at work and in their personal lives, experience better success in collaborative settings, and have higher self-regulation, empathy, self-awareness, motivation, and social skills.

Ms. Muir will share where lawyers typically stand in these areas and provide ways to assess, develop, and market your emotional intelligence in your lives and careers.
